SRIVARDHAN BABA VEMULA

Data Engineer | Python, SQL, AWS, PySpark, Kafka | Built 500K+ events/hour pipelines | Open to Summer 2026 & Full-Time Roles
Buffalo, New York, United States

Summary

I build scalable data systems that process high-volume data and support real-world analytics. • Improved pipeline throughput by 40% processing 200+ files/day • Built real-time pipelines handling 500K+ events/hour (Kafka + Spark) • Reduced query latency by 30% across production datasets • Processed 100GB + data using PySpark with 65% faster runtimes I have 3+ years of experience across data engineering, analytics, and machine learning, working with Python, SQL, AWS, Azure, PySpark, Kafka, and Airflow. Currently pursuing a Master's in Data Science at the University at Buffalo (Dec 2026). Open to: Data Engineering | Data Science | Data Analyst roles (Summer 2026 internships + full-time opportunities) #DataEngineering #DataScience #DataAnalytics #OpenToWork #Internship2026 #FullTimeJobs #Python #SQL #Cloud #BigData

Experience

Artificial Intelligence and Data Science | University at Buffalo
Graduate Research Assistant (AI & Data Systems)
January 2026 - Present (6 months)
Buffalo, NY

- Developed and integrated frontend and backend components using React, Flask, and Jinja templates for AI-driven application workflows
- Built and connected REST APIs to enable real-time interaction with machine learning models and backend systems
- Optimized application performance and responsiveness, improving system efficiency and user experience
- Designed scalable backend logic within a Python-based environment supporting data and model integration
- Contributed to debugging, testing, and improving reliability of AI-enabled system components

University at Buffalo

7 months

Library User Services Student Assistant

March 2026 - Present (4 months)

Buffalo, NY

- Managed document delivery workflows, including scanning, processing, and distribution of materials
- Assisted users with library systems, technology tools, and service workflows
- Maintained accuracy through detailed record-keeping and verification processes
- Handled high-volume requests ensuring timely and efficient fulfillment
- Improved workflow efficiency by maintaining organized processing and reducing delays in document handling

Student Assistant - Fitness Leader

December 2025 - Present (7 months)

Buffalo, NY

- Ensured safe and efficient operation of fitness facilities by monitoring equipment usage and enforcing safety protocols
- Supported daily facility operations, including equipment checks and maintenance coordination
- Delivered high-quality customer service while assisting users with equipment and facility policies
- Maintained cleanliness and operational standards across the facility
- Contributed to smooth day-to-day operations through coordination with staff and proactive issue resolution

Broadridge India

Cloud and Data Engineer

September 2024 - August 2025 (1 year)

Bengaluru

- Engineered AWS and SFTP data pipelines processing 200+ files/day, improving throughput by 40% and reducing manual effort by 15 hours/week
- Developed and maintained enterprise data workflows using Sterling File Gateway, achieving 99.8% system uptime
- Designed monitoring and validation frameworks across 12+ production pipelines, improving reliability and reducing failures
- Optimized 20+ SQL queries and redesigned schemas, reducing analytics query latency by 30%

- Reduced incident response time by 25% through workflow automation and real-time alerting

No-company. (Self-employed.)

Data Engineer & Data analyst

August 2022 - August 2024 (2 years 1 month)

- Built Python-based ETL pipelines ingesting 500K+ records from 10+ sources, reducing processing time by 45%
- Designed relational schemas and indexing strategies, improving query performance by 60%
- Developed 15+ dashboards using Tableau and Power BI, reducing manual reporting by 6 hours/week
- Implemented data validation frameworks ensuring 99.5% accuracy across datasets exceeding 2M records

PwC

Power BI Virtual Case Experience

July 2023 - July 2023 (1 month)

Tata Technologies

Data Visualisation: Empowering Business with Effective Insights

July 2023 - July 2023 (1 month)

Computer Society of India

President

August 2020 - July 2023 (3 years)

Nizamabad

Encouraged student participation and skill development in the area of IT through the initiation of weekly seminars and hands-on activities focused on technical skills. Developed and facilitated career programs generating interest in new areas of IT, established internships with professionals, and created opportunities for direct interaction with DRDO scientists and other professional practitioners. Supported students in developing effective coding skills, knowledge of cryptography, and skills to solve technical problems resulting in higher internship and job placement rates in the field of IT.

Education

University at Buffalo

Master of Science - MS, Data Science · (August 2025 - December 2026)

Kshatriya College of Engineering

Bachelor of Technology - BTech, Computer Science · (August 2019 - July 2023)

C V Raman Junior College

MPC · (June 2016 - May 2018)

Zilla Parishad High School

SSC · (June 2015 - April 2016)
